Compact packaging

KNOTT SLOVAKIA

YOUR TAILOR-MADE MANUFACTURER

As a strategic member of the KNOTT Group we develop and produce key products in trailer technology. We are also involved in the production of sophisticated industrial brakes and have evolved into a high-quality airport ground support equipment manufacturer as well.

The ability to tailor our products to customer's needs, along with professional consulting and cooperation since the early development stages of a new product, as well as the in-house accredited testing laboratory are the main advantages of our company.

Paying attention to customer feedback, combining newest technologies with know-how based on decades-long experiences, and the implied highest product quality are characteristic for all companies within the Knott Group.
